Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Engleson et al. (U. S. Patent 5,781,442) in view of Adamson et al. (U. S. Pub. No. 2002/0128871).

Regarding claims 1 and 21, Engleson discloses all the claimed invention of a data communications server (figure 1) for managing intrathecal therapy, including a computerized network of patient node 80, pharmaceutical node 60, clinician node (part of nursing) 70/120/130, a drug pump data (figure 7), except positively disclosing having direct input from drug pump manufacture. Adamson clearly discloses of having drug manufacturer information as one of the source (node) figure 2, column 3, paragraph, [0043]. It would have been obvious to one of ordinary skill in the art to modify the server of Engleson by adding a node for a manufacturer (the drug pump manufacture information) to make the overall system more reliable and smooth operation of the pump as well as alert the operator on any types of abnormalities.

Regarding claims 2-3 and 22-26, the presence of a data communications server in the system of Engleson can perform or easily modifies to execute the claimed invention.

Regarding claims 16-17, the server system of Engleson is computerized thus inherently possesses the real-time information management system.

Regarding claims 4-15 and 27-31, already modifies system of Engleson inherently possesses the computerized method.

Response to Arguments

2. Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
